

The screenshot displays the Microsoft Access interface. On the left, the 'Tabelle' (Tables) list shows various system tables, with 'MSys_DF02_TIPO_OGGETTO' selected. The main window shows the structure of this table. The table has columns for object type (TIPOOGGETTO_s), selection (Scel_b), stamp (Stam_b), cancellation (Canc_b), aggregation (Agg_b), blocking (BLOCC_b), and order (IdOrd_Inq). The 'TIPOOGGETTO_s' column lists object types: FORMS, MACRO, MODULES, PAGES, QUERY, REPORTS, and TABLE. The 'Scel_b' column has checkboxes for each type, and the 'Stam_b' column has checkboxes for each type. The 'Canc_b' column has checkboxes for each type, and the 'Agg_b' column has checkboxes for each type. The 'BLOCC_b' column has checkboxes for each type. The 'IdOrd_Inq' column has values 0 for each type. The 'TIPOOGGETTO_s' column has a value of 01 for the first row (FORMS). The 'Scel_b' column has a value of 1 for the first row (FORMS). The 'Stam_b' column has a value of 1 for the first row (FORMS). The 'Canc_b' column has a value of 1 for the first row (FORMS). The 'Agg_b' column has a value of 1 for the first row (FORMS). The 'BLOCC_b' column has a value of 1 for the first row (FORMS). The 'IdOrd_Inq' column has a value of 0 for the first row (FORMS). The 'TIPOOGGETTO_s' column has a value of 01 for the first row (FORMS). The 'Scel_b' column has a value of 1 for the first row (FORMS). The 'Stam_b' column has a value of 1 for the first row (FORMS). The 'Canc_b' column has a value of 1 for the first row (FORMS). The 'Agg_b' column has a value of 1 for the first row (FORMS). The 'BLOCC_b' column has a value of 1 for the first row (FORMS). The 'IdOrd_Inq' column has a value of 0 for the first row (FORMS).
